

«SMART RURAL» MEANS CATCHING THE FUTURE, BRINGING URBAN ELECTRICAL QUALITY TO RURAL AREAS. THIS IS EXACTLY WHAT THIS PROJECT WILL DO.

WE INVENT THE SMART RURAL GRID

WWW.SMARTRURALGRID.EU

OUR VISION:

The **Smart Rural Grid project** aims to develop the smart rural grid and explore the best ways to make the transition from the current rural distribution networks to the new using novel smart grid technologies and associated business concepts.

OUR MISSION:

To develop an **Intelligent Distribution Power Router (IDPR)**.

To develop **new technologies for PLC** over electricity distribution networks.

To develop a **robust communication network** to connect IDPRs with each other.

To develop a **data and energy control system** that manages different micro-production units and IDPRs.

To integrate all the novel features into **one, single platform.**
